

Avani Solutions- Procurement Policy 2025

Avani Solutions is committed to sustainable procurement that reduces environmental impact and supports its Net Zero 2050 goal. Environmental responsibility is embedded into all purchasing decisions, with a strong focus on responsible sourcing of cleaning chemicals.

This policy covers all procurement and suppliers.

Procurement Commitments

Avani Solutions will:

- Prioritize low-carbon, biodegradable, and environmentally safe products.
- Strive to source products that are manufactured in the UK, to reduce transport emissions.
- Source refurbished or remanufactured goods where feasible and appropriate.
- Minimize packaging and single-use materials.
- Give preference to suppliers that illustrate credible sustainability practices.
- Consider 'whole-life' environmental impact when purchasing.

Measuring & Continuous Improvement

Avani Solutions will measure and review the environmental impact of its procurement activities to support decision making and improvement. This includes:

- Reviewing procurement practices annually in line with our annual Climate Action Plan.
- Tracking the environmental impact of our purchased good and services.
- Improving the quality of supplier sustainability data over time.
- Using finding to refine sourcing decisions and strengthen sustainable procurement practices.

Supplier Expectations

Suppliers may be required to demonstrate environmental responsibility, provide sustainability data, and support Avani Solutions' climate commitments.

This policy will be reviewed annually and updated as required.
